

SUSTAINABILITY POLICY STATEMENT

QAIA-CEO-QSM-PO-003-02

Sustainability Policy

Purpose

Airport International Group is committed to fostering a sustainable society by protecting and, where possible, enhancing its socioeconomic and environmental imprint. This includes preventing pollution and promoting sustainable economic development as part of the transition to a low-carbon future.

Our airport operations are conducted with the utmost care to minimize negative environmental and social impacts. We adhere to an Integrated Management System (IMS) consisting of processes, policies and procedures, ensuring compliance with applicable laws and regulations while aligning with our corporate strategies.

Scope

The Airport International Group Sustainability Policy applies to all services under the company's scope, as detailed in the IMS document.

Environmental Management System

Airport International Group's Environmental Management System encompasses the following key components:

- Water Management
- Energy Management
- Waste Management
- Soil and Groundwater Management
- Biodiversity Protection
- Climate Change Management
- Air Quality Management

Commitments

Airport International Group is dedicated to:

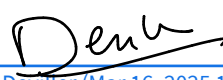

- ➔ Adhering to Jordanian regulations and other applicable requirements while aligning with international best practices followed by prestigious global entities - such as the IFC, EBRD and MIGA - particularly regarding the environment and energy efficiency, use and consumption.
- ➔ Setting and reviewing environmental objectives and targets in alignment with the company's strategic goals.
- ➔ Ensuring the availability of necessary information and resources to achieve sustainability objectives and targets.
- ➔ Developing and implementing a robust sustainability management system to drive continual performance improvements.
- ➔ Implementing mitigation measures to reduce the carbon footprint and resource consumption from the company's direct activities, with a firm commitment to achieving net-zero carbon emissions by 2050.

- Controlling air pollution sources and continuously monitoring air quality at the airport to ensure compliance with national and international standards where applicable.
- Acknowledging climate change as a scientific fact and adopting measures to reduce its negative impacts.
- Implementing a waste management system that prioritizes minimization, segregation and recycling of solid waste.
- Contributing to relevant United Nations Sustainable Development Goals (UN SDGs) - focusing on Goal 6 (Clean Water and Sanitation), Goal 7 (Affordable and Clean Energy) and Goal 13 (Climate Action), and deploying measures to support these goals.
- Fostering a sustainability-friendly culture amongst airport staff and encouraging them to propose sustainability initiatives.
- Communicating and promoting sustainability commitments to contractors, stakeholders and other interested parties, ensuring that sustainability considerations are reflected within their management systems and contractual agreements where applicable.
- Preventing pollution from company operations, as well as safeguarding the environment, biodiversity, local communities and public well-being.
- Providing fair working conditions and equal opportunities for all Airport International Group employees, regardless of gender or religion.
- Integrating sustainability criteria (such as energy and water efficiency) into procurement processes, as well as supporting eco-friendly products and services with low impact on environmental performance and public health.
- Embedding sustainability considerations into the design, construction and operational phases of future development projects, as well as applying a lifecycle approach to reduce overall environmental and resource consumption impacts.
- Implementing a sustainable water management system that addresses the scarcity of this vital resource and ensures a reliable potable water supply at the airport through a comprehensive water-saving action plan.
